

# SCOUT

**\$ 999.00**

## STATIONARY HAND HELD DIRECTIONAL RADAR

The Scout is a battery-operated handheld radar unit, which uses NiMH rechargeable AA batteries instead of expensive batteries. The Scout also charges from the vehicle's 12V power source, keeping the Scout always ready with the power you need to keep your streets safe. Its portability makes the Scout handheld radar a flexible police radar gun – whether in the car or on patrol.
