# X-SERIES LIDAR

Stalker Lidar XLR and XS are the smallest and highest handheld, gun-type lasers on the market today. At a mere 2.3 lbs. including removable/rechargeable battery handle the X-Series may be the lightest of all hand-held, but it is no lightweight. The new Snap-in Li-con battery handle provides ample power to last two or more shifts. Plus, the battery can be expected to last thru more the 500 charging cycles.

Target acquisitions is 1/3 second. The X-Series Long Range (XLR) is the best choice for targets as far as 4,000 ft. away while the X-Series Standard (XS) is ideal for metropolitan and suburban departments.
